## CellType

The figure is a vertical bar chart titled "roadCellType". The y-axis lists twelve cell types: NPC, EGL-NPC, WM-NPC, NascExN, NascInN, NascMSN, EGL-TransGran, ExN, MSN, GraN, and PurkN. The x-axis is a color gradient representing a continuous variable, likely a score or index, ranging from approximately -0.5 (red/orange) at the left end to +0.5 (green/blue) at the right end. Each cell type is represented by a horizontal bar whose color corresponds to its position on the x-axis.

Cell Type	Approximate Position (x-axis)
NPC	-0.5
EGL-NPC	-0.4
WM-NPC	-0.3
NascExN	-0.2
NascInN	-0.1
NascMSN	0.0
EGL-TransGran	0.1
ExN	0.2
MSN	0.3
GraN	0.4
PurkN	0.5
